Site configuration:

A .htaccess file in the top-level folder contains the following instructions: # Go to the specially provided Error 404 page on Error 404 (page not found) ErrorDocument 404 https://suttonpoyntz.org.uk/index.php/error-404

Force the whole site to use HTTPS encryption
RewriteEngine On
RewriteCond %{HTTPS} !=on
RewriteRule ^(.*)\$ https://%{HTTP HOST}%{REQUEST URI} [L,R=301]

Templates:

The site is based on the Cassiopeia template, which is an integral part of Joomla 4. We created a child template, called site1, which is used throughout the website. This child template has the following changes, compared with the basic Cassiopeia template:

```
Settings
     Brand - No
     Sticky header - Yes
error.php - add the following, to use own error-404 article for error 404 handling
     if (!isset($this->error))
     {
              $this->error = JError::raiseWarning(404, JText:: ('JERROR ALERTNOAUTHOR'));
              $this->debug = false;
     }
     /** If applicable, go to our own Error 404 page */
     if ((\frac{1}{2} = \frac{404'}{404'})
              header('Location: /index.php/error-404');
              exit:
user.css - special CSS styling, as follows (but for efficiency I have not included the CSS comments):
     /* Set colour for links */
     :root {--cassiopeia-color-link:#0b57d0;}
     /* Link underlining - In Footer always underlined, otherwise underlined when hovered */
     a:not([class]) {text-decoration:none;}
     .footer a {text-decoration:underline;}
     a:hover {text-decoration:underline;}
     /* Link colours */
              /* Default colour for hovered ordinary links */
     a:not(.btn):hover {color:var(--cassiopeia-color-link);}
              /* Different colour in Main Menu top level and in Footer */
     .container-header .mod-menu > li > a:hover {color:#a0a0ff;}
     .footer a:hover {color:#a0a0ff;}
              /* Default colour for Main Menu level 2 items */
     .container-below-top a, .container-below-top a:hover {color:var(--cassiopeia-color-link);}
     /* This corrects an oddity in Cassiopeia, that in wide windows, hovered links are not underlined */
     @media (min-width: 992px) {
      .container-header .metismenu > li.level-1.active > a, .container-header .metismenu > li.level-
     1.active > button.
      .container-header .metismenu > li.level-1 > a:hover,
       .container-header .metismenu > li.level-1 > button:hover {
        text-decoration: underline;
       }
     }
     /* This section controls how the main section header pages display a background image, with text
     on top. */
     /* We also give direct style definitions for the following:
              .overlay img2 {min-height:<some value>;}
     and sometimes
```

.overlay txt {background-color:<some-value>;} /* /* There were some other direct style definitions, which can be removed after a time */ .overlay cont {position: relative; top: 0; z-index:1; margin:auto; max-width:1000px; backgroundcolor:#304830;} .overlay img2 {position:relative; top:0; z-index:-1; width:100%;} .overlay img2 img {width:100%;} .overlay btm {position: relative; bottom:0; font-size:8px; line-height:8px;} .overlay txt {position: absolute; top: 30px; left: 5%; right: 5%; background-color: #1d0e0355; color: #ffffff; padding-bottom: 10px;} /* Specifies colour and behaviour of links on section header pages */ .overlay txt a, {color:#ffffff; text-decoration:underline;} .overlay txt a:hover {color:#a0a0ff;} /* Spacing at bottom of page Header */ .container-header {margin-bottom:0.5em;} /* Controls behaviour of top part of header, containing Main Menu, Site Title, and Search */ .container-header .container-below-top {padding-top:0; padding-bottom:0; display:flex; flexwrap:wrap; justify-content:space-between;} /* Controls behaviour of Main Menu */ .navbar {align-items:flex-start;} @media (min-width: 768px) {.navbar-expand-sm, .navbar-expand-md, .navbar-expand-lg, .navbarexpand-xl, .navbar-expand-xxl, {-ms-flex-wrap: wrap;flex-wrap: wrap; -webkit-box-pack: justify;-ms-flex-pack: justify;justify-content: space-between;}} @media (min-width: 768px) {.navbar-expand-sm .navbar-toggler, .navbar-expand-md .navbartoggler, .navbar-expand-lg .navbar-toggler, .navbar-expand-xl .navbar-toggler, .navbar-expand-xxl .navbar-toggler {display: flex;}} @media (min-width: 768px) {.navbar-expand-sm .navbar-collapse, .navbar-expand-md .navbarcollapse, .navbar-expand-lg .navbar-collapse, .navbar-expand-xl .navbar-collapse, .navbar-expandxxl .navbar-collapse {-ms-flex-preferred-size: 100%;flex-basis: 100%;display: none !important;}} .container-header .navbar-collapse.show {display: flex !important;} @media (min-width: 992px) {.container-header .mod-menu {-ms-flex: 1 1 100%; -webkit-box-orient: vertical;-ms-flex-direction: column; flex-direction: column; }} .container-header .mod-menu {float:right;} /* Controls display, when expanded, of Main Menu items */ .metismenu.mod-menu .metismenu-item {font-size: 1rem; line-height: 1.1; padding: 0.5em 1em;} /* Space above first item of page content */ : container-component > * + *, : container-component > : first-child, : container-sidebar-left > * + *, :container-sidebar-left > :first-child, :container-sidebar-right > * + *, :container-sidebar-right > :first-child {margin-top: .5em;} /* Padding at top and bottom of page Footer */ .footer .grid-child {padding-top: .5em; padding-bottom: 0;} /* These items vary the font size in section header pages as the window width decreases */ @media (max-width: 576px) {.overlay txt h1 {font-size:calc(1rem + 2.54vw)}} @media (max-width: 576px) {.overlay txt h3 {font-size:calc(0.75rem + 2.13vw)}} @media (max-width: 576px) {.overlay_txt p {font-size:calc(0.5rem + 1.39vw);}} /* Sets margin below text paragraphs in section header pages */ .overlay_txt p {margin-bottom:0.5rem;} /* Redundant - relates to DJ-ImageSlider which is not now used */ .card-body {padding:0} /* Space between site logo and site name */ .mod header logo {margin-right:10px;} /* Padding above Main Menu (first instruction here seems to be redundant) */ .container-header nav {margin-top:0} .container-below-top nav, .container-below-top .mod-finder {margin-top:20px;} /* Controls display of Breadcrumb */ .container-header .container-nav {display:flex; flex-direction:column; flex-wrap:wrap; justify-

     .* Controls display of Gallery slides */
     slideplus-stripe>div {flex-wrap:wrap;}
     /* Site Map line height */
     .menu sitemap {line-height:1;}
     /* Make Footer full width */
     .footer .custom {width:100%;}
     /* Don't display type, author etc. of pages found in Search */
     .result taxonomy {display:none;}
Adapted code - file /templates/cassiopeia site1/html/mod finder/default.php was edited so that the Search
```

item on each page appears just as a Search icon, which expands when clicked to show the Search text box. In the code below, text in green has been added and text in purple has been deleted, when compared with the original PHP code.

```

- </div>
- Adapted code file /libraries/src/Filesystem/Folder.php was edited to add an @ symbol before the 3 instances of the set_time_limit instruction, so that the instruction does not generate an error message every time (one.com do not allow this instruction to be executed).

Settings: The Global Configuration was amended as follows:

Menus: Disable "Show Page Heading"

Articles: Disable "Article Info Title", "Category", "Author", "Publish Date", "Navigation" and "Hits" Text filters: Managers and SuperUsers are set up with a Custom Forbidden List - this list has the same attributes as the Default List, and includes all the same tags apart from embed and iframe, which are now allowed

Extensions: The following Joomla extensions were installed:

Akeeba Backup - this is used for taking regular backups of the site, which allows us to restore the site if it becomes corrupted or if we wish to move it to another location

jDownloads - displays Archive pages as file and folder tree

sigplus - displays image galleries

JCE Editor - this is the selected Article Editor

boxplus - this is used to display material (images, video, audio clips, etc.) in pop-up "lightbox" windows Easy Folder Listing - this extension allows a list of files in a server folder to be displayed, as links Phoca Maps - the extension selected for displaying Google Maps in the website Slideshow CK - this extension displays the event banners on the Events page

Modules: Several Site Modules were created, and others deleted or modified. These are used to display special content on the site or on individual pages

Login module: Remove this standard module (ability to log in to site front end not required)						
Main N	Main Menu: The default Main Menu module was adapted to display the main menu (as an expandable					
hamburger icon) on all pages. Settings as follows (those modified from the default highlighted in red:						
	Select Menu	Main Menu	Base Item	Current		
	Start Level	1	End Level	3		
	Sum menu items	S Show	Title	Show		
	Position	below-top	Ordering	1. Main Menu

Article contents. The following is a description of how the various special web pages have been created:

contents. The following is	s a description of now the various special web pages have been created.
Section header articles	(Home, What's On, Amenities, Community, Our Village, Environment) are struc-
tured (when viewed as 0	Code) as follows:
<pre><div class="overlay_co</pre></td><td>ont'' ></td></tr><tr><td><div class=" overlay_<="" td=""><td>_img2" style="min-height: [xxx]px;"></td></div></pre>	_img2" style="min-height: [xxx]px;">
<img <="" src="[ggg]" td=""/> <td><i>alt="" /></i></td>	<i>alt="" /></i>
<div class="overlay_</td><td>_btm"></div>	
<div class="overlay_</td><td>_txt" style="background-color:[ccc];"></div>	
<h1>[hhh]</h1>	
[sss]	
<table style="bord</td><td>ler: 2px solid #ffffff; margin-left: 5%; margin-right: 5%; padding: 5px;"></table>	
[<i>ttt</i>]	
Here:	
• [xxx] is the minimu	im height of the image container, chosen to ensure the content does not overflow ver-
tically as the windo	w width is varied
• [ggg] is the location	n of a background image
• [ccc] is a semi-tran	sparent colour chosen so that the white text displays clearly over the background im-
age	
• [hhh] is a page title	
• [sss] is a page sub-	title
• [ttt] is the content of	of a table, consisting generally of two rows of two or three columns, containing head-
line and descriptive	e text with links to other articles
The values are as follow	vs:
Home	[xxx] = 440nx
11011101	[ggg] = home_background2.ing
	[ccc] = #1d0e0355
	[hhh] = Welcome to Sutton Poyntz
	[sss] = A village near Dorset's world heritage coast and the seaside town of Wey-
	mouth
	[ttt] contains links to What's On (plus lower level links to News Events and Di-
	ary) Amenities (plus Village Halls Pubs and Churches) Community (plus SP So-
	ciety Clubs & Groups Street Favre and Projects) Our Village (plus Maps Leaf-
	lets History and Environment) Gallery and Archive

longitude -2.41770, at Google Maps zoom factor 14, in a window of width 80%, height 500px; They are all displayed as Roadmaps, with normal controls located top-left. Each one has an associated KML file which generates an overlay with the appropriate history map. The KML files are held in a folder /phocamapskml (which cannot be accessed via Joomla's Media facility). Each of these KML files loads a map overlay image which is held in folder /images/History/Maps.

<u>Site Map</u> and <u>Are you lost?</u> (the Error 404 page): These pages both display a list of web-pages by including the following command:

{loadposition sitemapmain}

<u>Gallery</u> pages: The gallery pages that display images contain commands of the following form: {gallery cols=6 rotator delay=3000}[folder name]{/gallery}

Here, [folder name] is the location of the folder containing the images to be displayed.

The value of the cols parameter specifies how many image thumbnails are displayed side by side.

If there are 6 or fewer images, then the rotator delay parameter should be set to zero so the software does not try to scroll through the images.

Newsbite archive: The list of all Newsbites is displayed by including the command

{loadposition archive-newsbite}
